Describe Element/Component/Type of Inspection: *

~~-all footings inspected are excavated for proper width and thickness in accordance with the sealed set of construction documents for the foundation plan design (reference permit no. for record of sealed set of construction documents).~~

-all footings inspected are clean, dry, and free of organic material and debris at the time of the inspection.

~~-all footings have been inspected by means of standard soil probe and will provide a 2000 psf minimum bearing capacity per Table R401.4.1 of 2018 NCRC for CL, ML, MH and CH class of material.~~

*(subgrade form/letter may also be required)

Attestation/Signature:

By signing below, I certify that the component and/or element of the building as identified on this form has been inspected by me or someone under my direct supervision per subsection (b2) of NC G.S. 153A-352 and is in compliance with the approved plans & specifications for the project. This inspection is in compliance with all of the requirements of the above referenced code. Attach any additional documents if needed.

Licensed Architect or Engineer

Inspection Department disclaimer:

Upon the receipt of a signed written document as required under subsection (a) of Article 160A-413.5., Code Enforcement shall be discharged and released from any liabilities, duties and responsibilities imposed by this article or in common law from any claim arising out of or attributed to the component or element in the construction of the building for which the signed written document was submitted. Be aware that this inspection will be noted in all inspection records including the Certificate of Occupancy or Certificate of Compliance. This inspection does not address any local ordinances or zoning requirements.
