

# DESIGN PROFESSIONAL INSPECTION FORM

RECORD OF THE INSPECTION OF A COMPONENT OR ELEMENT BY A NC LICENSED ARCHITECT OR ENGINEER

## Project Information:

Residential Single-Family Project: <b>Yes</b>	Commercial Project: <b>No</b>
Code Enforcement Project No: -----	Permit No: 2306-0014
Project Name: Prince Place 41	Owner: Davidson Homes
Project Address: 273 Castle Pond	Suite No:
Date Inspected: 6-30-23	Contractor Name:
Component Inspected: Footing	

## Responsible Licensed NC Architect or NC Engineer

Name:	Bryant Mueller, PE		
Firm Name:	TM Engineering, Inc.		
Phone Numbers:	Office: 919-468-2545	Mobile:	
Email Address:	bryantm@tmengineering.org		
Mailing Address:			

**APPLICABLE CODE:** 2018 NCRC: Sections R403.1.1, R403.1.4, R403.1.5

2018 NCBC = 2018 NC Building Code; 2018 NCRC = 2018 NC Residential Code

Describe Element/Component/Type of Inspection: \*

3rd party inspection of layout and dimensions per town approved onsite plans per applicable

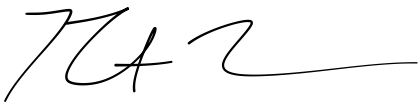

2018 NCRC. See attached letter for specific language regarding TME services.

Porch/deck included

\*(subgrade form/letter may also be required)

## Attestation/Signature:

By signing below, I certify that the component and/or element of the building as identified on this form has been inspected by me or someone under my direct supervision per subsection (b2) of NC G.S. 153A-352 and is in compliance with the approved plans & specifications for the project. This inspection is in compliance with all of the requirements of the above referenced code. Attach any additional documents if needed.

Licensed Architect or Engineer

6/30/23  
Date

## Inspection Department disclaimer:

Upon the receipt of a signed written document as required under subsection (a) of Article 160A-413.5., Code Enforcement shall be discharged and released from any liabilities, duties and responsibilities imposed by this article or in common law from any claim arising out of or attributed to the component or element in the construction of the building for which the signed written document was submitted. Be aware that this inspection will be noted in all inspection records including the Certificate of Occupancy or Certificate of Compliance. This inspection does not address any local ordinances or zoning requirements.

### Report of Foundation Bearing Conditions

Project: Prince Place 41 & 3rd Party  
Location: Fuquay  
Client: Davidson Homes  
Date: June 30,2023

TM Engineering, Inc. has inspected foundation bearing conditions for the above referenced construction. Our evaluation consisted of visually evaluating the exposed subgrades and by probing with a 1/2 inch steel rod. Dynamic cone penetrometer techniques were used to correlate surface soil conditions to bearing capacity. Foundations were excavated up to 8.00 ft below site grade. Results indicate the exposed soils to have penetration resistance which will provide the specified minimum 2,000 PSF of bearing capacity. It should be noted that minor cracking commonly occurs in construction for various reasons including but not limited to, temperature fluctuations relative to expansion and contraction of materials, concrete shrinkage, changes in moisture content, improper construction, and normal settlement. No warranty is implied for such items by this letter. Additionally, exposure of the soil subgrades to incimate weather may compromise conditions requiring repairs and reinspection.

TME Notes included:

- Porch/deck included
- 3rd party inspection of layout and dimensions noted to be consistent with onsite plans
- Design Professional Inspection Form attached referencing 2018 NCRC sections R403.1.1, R403.1.4, & R403.1.5
- Rebar reinforcement installed per plans
- Two strands of No. 4 steel reinforcement placed in continuous footings
- Repairs due to presence of unsuitable soils
- Footings repaired by over-excavating to suitable bearing
- Footings backfilled with washed stone to design bearing elevation
- Interior piers connected due to close proximity

Sincerely,

**TM Engineering, Inc.(C3201)**
