Footing Inspection
Lot 32 Cotton Farms
246 Deer Tail Lane
Fuquay-Varina, NC 27526
Permit No.: SFD2307-0014

Mr. Adams:

At your request, a site visit was made to the above referenced single family residence under construction to inspect the footings prior to concrete placement.

The bottom of the footings was inspected and firm residual sand and sandy clay was encountered at depths ranging from one to three feet below grade. The soil at the bottom of the footings will provide the minimum required bearing capacity of two thousand pounds per square foot.

Third party inspection revealed the footings for the single family residence were excavated per the approved plans with all concrete depths and step downs set correctly. The plan specified deck/porch footings were excavated at the time of inspection and are included in this report. A pier footing was combined with the wall footing and does not require separation. The footings are in conformance with Chapter 4 of the 2018 North Carolina Residential Code and are suitable for concrete placement.

Please contact us if you have any questions.

Respectfully submitted,
Hayes Structural Consulting & Design, PLLC
