Weaver Development Sinclair (190320B) Sinclair (190320B) Date: 9/20/2023 Input by: Lenny Norris

Project #:

Job Name: GDH

Kerto-S LVL 1.750" X 14.000" 2-Ply - PASSED **GDH**

Level: Level

| Member Information | | | | | | | |
|--------------------|---------------------|---------------|--|--|--|--|--|
| | Type: | Girder | | | | | |
| | Plies: | 2 | | | | | |
| | Moisture Condition: | Dry | | | | | |
| | Deflection LL: | 480 | | | | | |
| | Deflection TL: | 360 | | | | | |
| | Importance: | Normal - II | | | | | |
| | Temperature: | Temp <= 100°F | | | | | |
| | | | | | | | |

Application: Floor Design Method: ASD **Building Code:** IBC 2012 Load Sharing: No Not Checked Deck:

Design Notes

- 1 Provide support to prevent lateral movement and rotation at the end bearings. Lateral support may also be required at the interior bearings by the building code.
- 2 Fasten all plies using 3 rows of 10d Box nails (.128x3") at 12" o.c. Maximum end distance not to exceed 6".
- 3 Refer to last page of calculations for fasteners required for specified loads.
- 4 Girders are designed to be supported on the bottom edge only.
- 5 Top loads must be supported equally by all plies.
- 6 Top must be laterally braced at a maximum of 7'8 9/16" o.c.
- 7 Bottom must be laterally braced at end bearings.
- 8 Lateral slenderness ratio based on single ply width

Notes

Calculated Structured Designs is responsible only of the structural adequacy of this component based on the design criteria and loadings shown. It is the responsibility of the customer and/or the contractor to ensure the component suitability of the intended application, and to verify the dimensions and loads.

- Dry service conditions, unless noted otherwise
 LVL not to be treated with fire retardant or corrosive
- Handling & Installation
- LVL beams must not be out or drilled
 Refer to manufacturer's product information
 regarding installation requirements, multi-ply
 fastening details, beam strength values, and code
 approvals
 Damaged Beams must not be used

- Design assumes top edge is laterally restrained
 Provide lateral support at bearing points to avoid
 lateral displacement and rotation
- For flat roofs provide proper drainage to prevent ponding
