Re: Footing inspection

Subject: 144 Red Hill Church Road, Dunn, NC (SFD Stem Wall)
(Permit No. SFD2310-0057)
(Parcel No. 1507-15-8133.000)

To Whom It May Concern:

Enoch Engineers conducted a site inspection, November 4th, 2023 for the subject site(s) above. At this time, we observed that an existing concrete footing was encountered on the right side of the footprint. At these depths we observed the soil material to meet a minimum bearing capacity of 2,000 lb/ft². We recommend overlapping schedule No. 4 rebar a minimum of 4 feet each way at each interface (2) of the existing concrete and bare soil. If you have any questions, please reach our office at (919) 894-7765 or jason@enochengineers.com.

Respectfully,

Joe E. Godwin, Sr., PE
Enoch Engineers, PA
