RE: Lot 9 Griffon Pointe, 179 Grand Griffon Way, Lillington, NC 27546

This letter certifies that Prime Energy Group installed Owens Corning brand insulation in the walls and ceiling at Lot 9 Griffon Pointe, 179 Grand Griffon Way, Lillington, NC 27546, on August 23, 2024, ensuring compliance with, and often exceeding, the standards of the North Carolina Energy Efficiency Code.

We installed R-15 insulation in the walls, R-19 in the floor above the garage, and R-30 and R-38 batts in the ceiling of inaccessible spaces as required. The remainder of the accessible attic ceiling will be insulated with blown-in insulation toward the end of construction, and the crawl space will also be insulated at that time.

Sincerely,

A handwritten signature in black ink, appearing to read "Blake Pleasant".

Blake Pleasant
