I will relocate the line based on the Right of Way obtained after the between the properties in the new Easement.

Is this enough?

In order to do the ROW you can sent me a Plaque the day of the Property Name Change or you could wait for Harnett County to post it on the Website, but that takes time.

I can change WO# 52200113 to an infrastructure WO# Including a ROW. It would not have any accounting for any meters including temp.

When you call in the temp pole, tell them the pole will be right next to Pole CK46BH with an exist overhead transformer on it.
