^{*} Adjust LTAR due to depth, consistence, structure, soil wetness, landscape, position, wastewater flow and quality.

HORIZON DEPTH DEPTH OF FILL

SOIL WETNESS

In inches from land surface

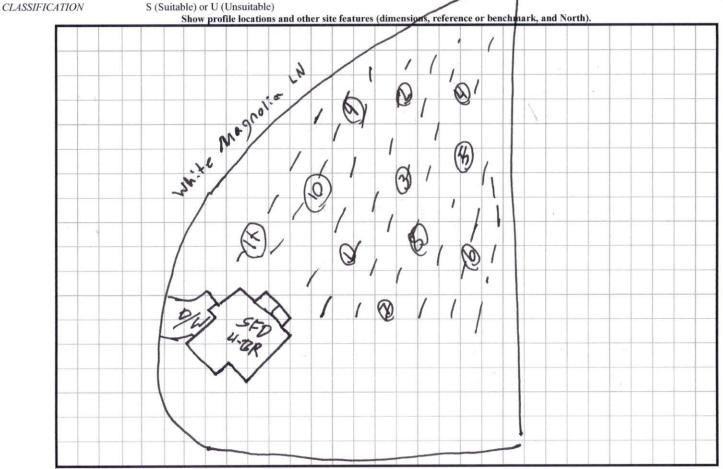

RESTRICTIVE HORIZON SAPROLITE

Thickness and depth from land surface

In inches below natural soil surface

S(suitable) or U(unsuitable); Evaluation of saprolite shall be by pits.

Inches from land surface to free water or inches from land surface to soil cotors with chroma 2 or less - record Munsell color chip designation S (Suitable) or U (Unsuitable)

^{**}Sandy clay loam saprolite can only be used with advanced pretreatment in accordance with 15A NCAC 18E .1200.
