Re: 24-FTG-162

Footing Inspection Lot 35 Cotton Farms 318 Deer Tail Lane

Fuquay-Varina, NC 27526 Permit No.: SFD2405-0070

Mr. Adams:

At the footing contractor's request, a site visit was made to the above referenced single family residence under construction to inspect the footings prior to concrete placement.

The bottom of the footings was inspected and firm residual silty clay was encountered at depths ranging from one to three feet below grade. The over-excavated sections where stumps were removed may have concrete placed at an increased thickness in lieu of washed stone replacement. The soil at the bottom of the footings will provide the minimum required bearing capacity of two thousand pounds per square foot.

Third party inspection revealed the footings for the single family residence were excavated per the approved plans with all concrete depths and step downs set correctly. The deck footings were excavated at the time of inspection and are included in this report. The footings are in conformance with Chapter 4 of the 2018 North Carolina Residential Code and are suitable for concrete placement.

Please call me if you have any questions.

Respectfully submitted,

Zachary H. Hayes, PE Owner/Structural Engineer Hayes Structural Consulting & Design, PLLC
