Project No. 2025-01-08

Certification of Work Performed Without Harnett County Inspection

Date: January 16, 2025

Project Information:

Project Name	Bass Residence
Address	1876 Neighbors Rd, Dunn, NC 28334
Building Permit #	SFD2405-0118
Lot#	1

Description of Work to be certified

A site visit was performed by Jenkins Consulting Engineers (JCE) on Thursday January 16, 2025 at approximately 1pm. The house is in the framing stage. Anchor bolts and solid grouted CMU can be observed in the garage as well as under the house. Sample areas in the crawl space were observed which indicate the proper placement of the sill plate with anchor bolts and solid grouted CMU. The foundation plan (by others) includes exterior wall and pier locations for the residence. The plans wall section detail indicates footing locations. The construction in its current state matches the plan provided to JCE.

Certification Statement

I was not involved in this project while the above-described work was being performed, nor am I the designer of record for the project.

I have reviewed all required Harnett County Code Enforcement approved project plans and specifications and have personally performed an on-site investigation of the work described above, and in my professional opinion, I find that the construction as completed, complies with the approved project plans and all applicable portions of the North Carolina State Building Codes.
