THIS IS A TRUSS PLACEMENT PROGRAM ONLY. These trusses are designed as individual components to be incorporated into the building design at the specification of the building designer. See individual design sheets for each truss design identified on the placement drawing. The truss designer is responsible for the design of the truss system and for the overall structure. The design of the truss support structure including headers, beams, walls, and columns is the responsibility of "Bering of Wood Truss", available from the Truss Plate Institute, 583 D'Oro Drive, Madison, WI 53719
