I visited the site on Friday, September 05, 2025. The purpose was to inspect the slab foundation excavation. Foundation excavation was thoroughly probed and inspected. A Compaction proctor test was performed. The test exceeds 90% modified proctor which satisfies 2000 Lb/sqft.

Recommendation: Therefore, the excavation is acceptable, firm and meets the load bearing requirements of NCBC, Residential 2018. **My seal and signature are affixed below for foundation excavation certification.**
