RE: Daily Field Report for 04/30/2025

Lot 80 Magnolia Ridge (CMT) Lillington, NC Building & Earth Project No : RD250321

#### Ladies and Gentlemen:

On this date, representative(s) of Building & Earth were present to perform construction material testing services at this project site. Our testing and observations for this date include the following:

FO-2: Field Observations made on this date.

• Project Management Review

Passed

**ST-5**: In place field density testing was performed for Finished Subgrade Soils -Building. The field density testing was performed in general accordance with ASTMD6938, using values from the laboratory proctors. One(1) in-place field density test was performed on this date. The testing results indicate that in-place compaction and moisture content at the location and depth tested meet or exceed the specified requirements outlined in the project plans and specifications. For additional details of our testing, please refer to the attached Field Density Test Report.

#### Closing

The testing and observations identified above have been reviewed by our project manager. If you have questions regarding this information, please do not hesitate to contact us.

Respectfully Submitted, Building & Earth Sciences, LLP

# **Field Observations Report**

Project Name: Lot 80 Magnolia Ridge (CMT) Lillington, NC Project Number: RD250321

Client Name: Dream Finders Homes-Carolinas Placement#: FO-2

Contractor: Technician: Matthew Hunt Jr.

Monitoring:

#### 1: Project Management Review

Passed

On this date, our representatives returned to the site for re-testing. Based upon our re-testing, the recommended repairs have been accomplished, and the building pad is now acceptable for the construction of the foundations.

Additionally, inclement weather (rain or snow), as well as construction traffic across the pad, can compromise the stability and support characteristics of the surface soils. If the surface soils become compromised, it will be necessary to return to the site for re-testing. This decision should be executed by your onsite Quality Control and Superintendents.

ST-5

Test Date: 04/30/2025

Field Technician: Matthew Hunt Jr.

Tests requested by: N/R Results provided to: N/R

## **Report of Field Density Testing**

Project Name: Lot 80 Magnolia Ridge (CMT) Lillington, NC Ambient Temperature: 60-70 Project Number: RD250321 Weather: Clear

Project Location: Lillington, NC Wind Conditions: Calm Client: **Dream Finders Homes-Carolinas** Results Provided To: N/R

Contractor: Dream Finders Homes-Carolinas Superintendent: N/R

Notes: 1 Test location by technician 2 Elevation by Technician

Fill/backfill placed prior to technician arriving

### **Design & Specification Data**

Area ID	Area Description	Depth (ft)	Test Method	% Compaction	Moisture Range	
					Min	Max
FSG-Bldg	Finished Subgrade Soils -Building	0.0 - 2.0	ASTM D-698	95 %	- 10.0	+ 10.0

# **Laboratory Proctors**

Proctor ID	Description of Material	USCS/AASHTO	Maximum Dry Density (pcf)	Optimum Moisture Content (%)
1-point			120.7	6.8%

#### **Density Test Data**

Test #	IDs		Test	Location	Probe Depth	Elev.	Dry	%	%	Result
