Reference: Evaluation of Foundation Bearing Conditions
17 Alton Fields
Dunn North Carolina
Project No. 1-25-0995-EA

Gentlemen:

GeoTechnologies, Inc. has completed the authorized footing inspection for the residential structure at Lot 17 Alton Fields in Dunn, North Carolina. Our evaluation of the exposed soils consisted of probing the soils with a 1/2 inch diameter steel probe rod, and performing hand auger borings. The footings were excavated at or near plan depth. The results of our evaluation indicate that the exposed subgrades within the footings will provide the 2,000 psf bearing capacity required for the proposed construction.

GeoTechnologies, Inc. appreciates the opportunity to provide you with our services during this phase of the project. Please contact us if you should have questions regarding this information or if we may be of further assistance.

Sincerely,

GeoTechnologies, Inc.

Ernest L. Stitzinger, P.E.
